Brand New Book. The University of Florida has an ambitious goal: to harness the power of its faculty, staff, students, and alumni to solve some of society's most pressing problems and to become a resource for the state of Florida, the nation, and the world. Florida has 51,858 miles of rivers and streams, more than 2 million acres of lakes and ponds, 11.4 million acres of wetlands, 4,437 square miles of bays and estuaries, and 8,436 miles of coastline. But these water resources face myriad threats. Tapping the Source takes us inside the UF Water Institute, where talent from throughout the university address complex water issues through innovative research, education, and public outreach programs. Interdisciplinary teams from the School of Natural Resources and Environment, the School of Forest Resources and Conservation, Environmental Engineering Sciences, Geological Sciences, Soil and Water Science, and other departments develop new scientific breakthroughs, creative engineering, policy and legal solutions, and pioneering educational programs that are renowned for addressing state, national, and global water-resource problems. The teams work...
